**Probing the ligand-receptor interface
of TNF ligand family members
RANKL and TRAIL**

Yizhou Wang

The research described in this thesis was carried out in the Department of Chemical and Pharmaceutical Biology (Groningen Research Institute of Pharmacy, University of Groningen, The Netherlands) and was financially supported by the China Scholarship Council, the Dutch Top Institute Pharma project TNF-ligands in cancer (project nr. T3-112) and the Dutch Science Foundation (NWO/STW) (grant 11056).

The research work was carried out according to the requirements of the Graduate School of Science, Faculty of Science and Engineering, University of Groningen, The Netherlands.

Printing of this thesis was financially supported by the University Library and the Graduate School of Science, Faculty of Science and Engineering, University of Groningen, The Netherlands.

university of
 groningen

Probing the ligand-receptor interface of TNF ligand family members RANKL and TRAIL

PhD thesis

to obtain the degree of PhD at the
University of Groningen
on the authority of the
Rector Magnificus Prof. C. Wijmenga
and in accordance with
the decision by the College of Deans.

This thesis will be defended in public on

Tuesday 30 June 2020 at 12.45 hours

by

Yizhou Wang

born on 22 April 1990
in Hebei, China

Supervisors

Prof. W.J. Quax

Prof. H.J. Haisma

Assessment Committee

Prof. R.A. Bank

Prof. B.N. Melgert

Prof. V.W. van Beusechem

Table of Contents

Chapter 1	General introduction and scope of the thesis	7
Chapter 2	TNF-family member Receptor Activator of NF- κ B (RANK) and RANK-Ligand (RANKL) in bone remodeling	19
Chapter 3	Novel RANKL DE-loop mutants antagonize RANK-mediated osteoclastogenesis	33
Chapter 4	Creation of RANKL mutants with low affinity for decoy receptor OPG and their potential anti-fibrosis activity	59
Chapter 5	Long term secretion of adenovirally-expressed RANKL WT/ Q236D for treatment of fibrosis	83
Chapter 6	Overcoming senescent cancer cell resistance to extrinsic apoptosis using a death receptor 5 (DR5) selective TNF-related apoptosis inducing ligand (TRAIL) variant	105
Chapter 7	Novel TRAIL variants with reduced binding to decoy receptor OPG overcome TRAIL resistance in breast cancers	131
Chapter 8	Summary and future perspectives	151
Samenvatting	Nederlandse Samenvatting	159
Appendices	Acknowledgements	168
	List of publications	173
	About the author	175
